change. Death of Professor Agassiz.

I From the N. Y. Sun. Dec. 15.1 Professor Louis John Rudolph Agassiz died at 10:15 o'clock last night. He was born in Motiers, canton of Fribourg, Swit-zerland, May 28, 1807. He was descended from a French, family of Huguenots who A RECENT commercial census of the cities of Davenport, Dubuque and Burlings ton, in Iowa, shows that Davenport has 784 business houses, Dubuque 664, and Burlington 562.

MR. DAVID BALLEY, of Cambridge, Maine, thinks that he is the oldest postmister in the service of the United States. He was commissioned in 1828, and has served ever since. school to the study of the natural sciences, his attention being first attracted to bota-

ny. Prof. Agassiz was educated for a physian, completing his studies at the Univer-ty of Munich, where he formed friendships among the most eminent men assem-bled there, and was afforded the best possi-ble opportunities for thoroughly acquaint-ing himself with all the branches of knowledge necessary to the naturalist. The return to Europe of a scientific ex-ploring expedition sent to Brazil by the ustrian and Bayarian Governments, after ne marriage of Don Pedro to an Austrian rincess, gave to Agassiz, then a student, a opportunity to manifest his remarkable has sued her lover for breach of promise, and claims \$21,000,000 damages. This the Detroit Free Press records, and then says:

"We have taken considerable pride in putting this item before the public, and now for our sake, we hope she woulded. Detroit Free Press records, and then says was one of the scientific corps, occupied was one of the scientific corps, occupied in putting this item before the public, and now for our sake we hope she won't go and settle the suit for a bob-tailed dog and six bushels of beans, as an Iowa woman did."

Provessor Looms deduces form the PROFESSOR LOOMS deduces from the lead department, upon which very little had been done, and the manner in which the average rate of progress of a storm in the very first rank of naturalists. Thus it

FARM AND FIRESIDE.

of raisins, one cup of currants, flour and nuture.

An Economical Ferrilizer.—The editor of the Sauthern Cultivator says: If planters will combine and purchase these commercial articles, good and true, at the lowest wholesale rates, and make the following compost, they will save the tens of thousands of dollars thrown away upon the fictitious mixtures sold so largely in the South. For the cotton crop, per acre:

The attention of our many readers is called to the attention of our many readers at the attention of our many re

cre:
los pounds sulphate of ammonia.
268 pounds perfect superphosphate of lime.
40 pounds mirrate of sects.
29 pounds mirrate of poinsh.
59 pounds common suit.
59 pounds greand plaster.
Mixed with 700 pounds muck or soil.

The same formula would answer for the IMPROVED FLOUR PASTE,-Paste which will keep unchanged in warm or damp weather, may be made in the following anner: Put a teaspoonful of powdered om in two quarts of water, and, let it oil. Mix a plat of flour smoothly into a pint of cold water, and stir it into the bolling alum water, continuing the bolling and stirring until the flour is cooked, and

bave the water in which clothes are washed no hotter than the lands can bear or to have the solled clothes wet in either coldor warm water before putting them into hot suds—at least to see that table linen and garments are not put into hot suds with dry stains upon them. Fine clothes are sometimes spoiled by boiling in hard water. Housekeepers may be obliged to wash with hard water, but it should be first made soft by alkali. The most common way is to add a little lye (white lye usually made by boiling ashes in water) to each boilerful of water, skimming it as it boils. Washing-soda is used for the same purpose. In any case skim the water, and boil the clothes in a bag. Clothes once made gray and spotted by boiling in hard water can never be made to look very well again. Another mistake is to boil the clothes too long. Fifteen minutes of good boiling mides the clothes that should be allowed. Too long boiling makes the clothes yellow and

found covering the stones in wells affected by sewage, is a true fungoid growth, and by sewage, is a true fungoid growth, and the system. It is undoubtedly concerned in the production of typhoid fever. How it acts it is difficult to determine, but it is at least conceivable that the spores of the fungus may get into the blood and bring about changes after the manner of yeast in beer. These spores, as is well known, develop rapidly by a kind of budding process, and but a little time passes before the whole circulation becomes filled with them, giving lise to abnormal heat and general derangement, called fever. These fungoid or confervoid growths are always present in waters removed impure by house drainage, and great caution should be used in our confervoid growths are always present in waters removed impure by house drainage, and great caution should be used in protection. trainage, and great caution should be used in maintaining well waters free from all sources of pollution.—Boston Journal of Chemistry.

A Good Fertilizer.

Farmers generally have to pay a high price for an article which, with a little kill, they could make themselves during skili, they could make themselves during the winter months or on rainy days, when they have little else to do. We give a recipe for a cheap, good fertilizer, which has been used successfully by farmers in Psunsylvania and Ohio. One recommends it especially for polatoes and wheat, and ends by saying that be has used it with success on corn and other products. It is as follows: Take 1,000 lbs. of good mold, sieve and screen it to get the gravel out as follows: Take 1,000 lbs. of good mold, sieve and screen it to get the gravel out and make it as fine as possible, then spread on a floor or some suitable place; add 100 lbs. sulphate of ammonia, 100 lbs. common sait, then nix with a rake. When thoroughly mixed, add 25 lbs. pearlish and 25 lbs. sulphate of sola, mix well, then add 400 lbs, ground bone, 25 lbs. best Peruvian guano, and 150 lbs. ground plaster. Mix the whole thoroughly, throw on a pile for forty-eight hours, and it is fit for use. If it is to be used for potatoes in districts where potato bugs are numerous, 5 guilons sulphuric acid may be sprinkled over the mass. Care must be taken not to use the acid in a confined place, as the fumes are bad for the health. place, as the fumes are bad for the bealth. If it is spilled on the floor, do not throw water on it, as it generates great heat when in contact with water. Sulphurle acid sprinkled on the ground will kill bugs of any kind, and its fumes are especially fatal to the potato bug.—Scientific Ameri-

Feed Fowls a Little and Often. It is a very careless method of feeding fowls which we see often adopted, where the grain is thrown down in great heaps on the ground or floor. It is not only wasteful, but injurious to the fowls, because they get over-fed, and it is in an important respect contrary to their habits, for their nature is to "scratch." Watch the old hen with a brood when she is just let out of the coop. She hardly stirs from the spot; but as soon as she has realized her freedom down go her claws into the soil, and afterward whenever you see her she is at it. Always feed, then, no more than can be caten at once, and take care that this is so scattered amongst some light rubbish that they may have the luxury of scratching for it. If feed is buried in fresh earth, then they get with their monthfuls of grain something of use to their peculiar digestive organs. Grain, however, should not be allowed to come in contact with the filthy, in the soil to be described in the subtraction. organs. Grain, however, should not be allowed to come in contact with the filthy, tainted soil too often found in the poultry-yard.

Progressive Agriculture.

chance to grow and prove their value, it is the same as putting a good hand into the field with poor tools to work with.

If you invest your money in a good farm, and do not cultivate twell, it is the same as marrying a good wife and so abusing and ensaying ber as to crush here. If you invest your money in a fine house, and do not cultivate your mind and faste so as to adorn it with intelligence and refinement, it is as if you were to wear broadcloth und a slik hat to mill.

If you invest your money in fine clothes, and do not wear them with dignity and refinement, it is as if you were to wear broadcloth und a slik hat to mill.

If you invest your money in fine clothes, and do not wear them with dignity and refinement, it is as if you were to wear broadcloth und a slik hat to mill.

If you invest your money in fine clothes, and do not wear them with dignity and case, it is as if a plowman were to sit at a jeweler's table to make and adjust hairspirings.

If you invest your money in strong the composition of the composition

other men enter into the sweets and re-CREAM COOKES.—One segs, one large cup of sugar, one cup of cream, one-half cup of sour milk, half a teaspoonful of soda, flour enough to roll.

LOAY CAKE.—Three eggs, one cup of sugar, half a cup of butter, one cup of cream, one teaspoonful of soda, one cup of cream, one teaspoonful of soda, one cup of cream, one teaspoonful of soda, one cup of raishus, one cup of currants, flour and nutneg.

and courageous policy.—N. Y. Herald.

THE attention of our many readers is called to the attractive advertisement of J. N. Harto the attractive advertisement of J. N. Harris & Co., advertising their great and valuable lung remedy, "Allen's Lung Balsam." This Halsam has been before the public for ten years. Notwithstanding this long period, it has never lost one whit of its popularity, or shown the least sign of becoming unpopular, but, on the contrary, the call for it has been constantly increasing, and at no previous time has the demand been so great, or the quantity made boon so large, as at this day. We carnestly recommendits trial by any one who may be afflicted with a cough or cold, and we warrant it to cure if directions are followed. It is sold by all our city druggists.

pint of cold water, and sair it into the bolling alam water, continuing the bolling and stirring until the flour is cooked, and the whole is clear like starch. Add to this about half a teaspoonful of essential oil of cloves, strain through a wire gauze of perforated iin strainer, and bottle in wide-mouthed jars, which should be corked to keep out dust.

MISTARES IN WASHING.—The directions for washing with the machines almost always advise very hot or boiling stude. But temember never to put dirty clothes into clear hot water. It "sets the dirt," and you must work very hard to get the clothes clean after such a mistake. Some fruit stains are removed by pouring boiling water through the spot, but some other stains are hopelessly "set" by such means, it seems to me the safest way either to have the water in which clothes are washed no hotter than the hands can bear or to have the water in which clothes are washed no hotter than the hands can bear or to have the water in which clothes are washed no hotter than the hands can bear or to have the water for putting them had a proper putting them had been and moderation in eating and drinking there are independent of the spot of the clothes are washed an hotter than the hands can bear or to have the water in which clothes are washed and hotter than the hands can bear or to have the water in which clothes are washed as an hotter putting them had been and moderation in eating and drinking there are provided and the provided and hotter than the lands can be a provided and hotter than the hands can be a provided and hotter than the hands can be a provided and hotter than the hands can be a provided and hotter than the hands can be a provided and hotter than the lands are removed by pouring believed to the content of the content of the provided and the provided and the provided provided to prove the carbonaceous, we have the substitute of provided provided to provide and the provided and the provided provided provided and the provided provided provided provided provided prov A NATION OF DYSPERTICS,-We liv EGAR BUTTERS and moderation in eating and drinking, there is no incurable case

Symptoms of Liver Complaint,

A sallow or yellow color of skin, or yellow th brown spots on face and other parts of ody; duliness and drow-iness with frequent eadache; dizziness, bitter or bad taste in headache; dizziness, bitter or bad laste in mouth, dryness of throat and internal heat; palpitation; in many cases a dry, teasing cough, with sore throat; unsteady appetite, raising of food, choking sensation in throat; distress, heaviness, bloatned or full feeling about stomach and sides, pain in sides, back or breast, and about shoulders; colle, pain and soreness through bowels, with heat; constipation alternating with diarrhea; piles, flatthence, nervousness, coldness of extremintes; rush of blood to head, with symptoms of apoplexy, numbness of limbs, especially at night; cold chills alternating with hot flashes, kidney and urinary difficulties; duliness, low spirits, unsociability and gloomy forchodings. Only a few of above symptoms likely to be present at one time. All who use Dr. Pierce's Alt. Ext., or Golden Medical Discovery for Liver complaint and its complications are loud in its praise.

A CURE OF LIVER DISEASE.

"A SLIGHT COLD," COUGHS.-Few are aware of the importance of checking a cough or "slight cold," which would yield to a mile remedy; if neglected, it often attacks the lungs. "Brown's Bronchial Troches" give sure and almost immediate relief.

PERSONS who have become thoroughly chilled from any cause, may have their circulation at once restored by taking into the stomach a teaspoonful of Johnson's Anodyne Liniment mixed in a little cold water, well sweetened.

EVERY farmer who owns a good stock of horses, cattle and sheep, and intends to keep them through the winter, should get at once a good stock of Sheridan's Cavatry Condition Powders. One dollar's worth will save at least half a ton of hay.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the naive berbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked. "What is the cause of the unparalleled success of VINEGAR BITreast" Our answer is, that they remove the cause of disease, and the patient re-covers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of Virkoak Bitters in healing the sick of every disease man is neit to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Billous

The properties of Dr. Walker's Vinegar Bitters are Aperient, Disphoretic, Caminative, Nutritions, Laxative, Disretic, Sedative, Counter-Irritant, Sudorific, Alterative, and Anti Bilions.
